

Stunov · Quick Overview · v2.2.0

One platform. Every tool a modern school needs.

Give your school a strong digital identity — and the tools to operate at world-class standards.

Website. Dashboard. Portal. Two mobile apps. One subscription.

From admission to graduation — all in one place.

STUNOV APP

Stunov
For students & parents

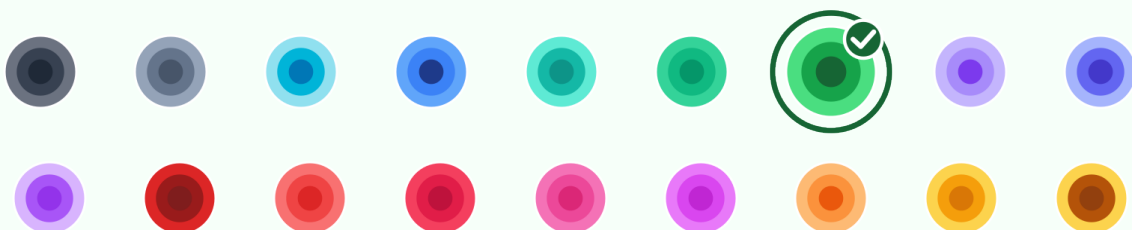

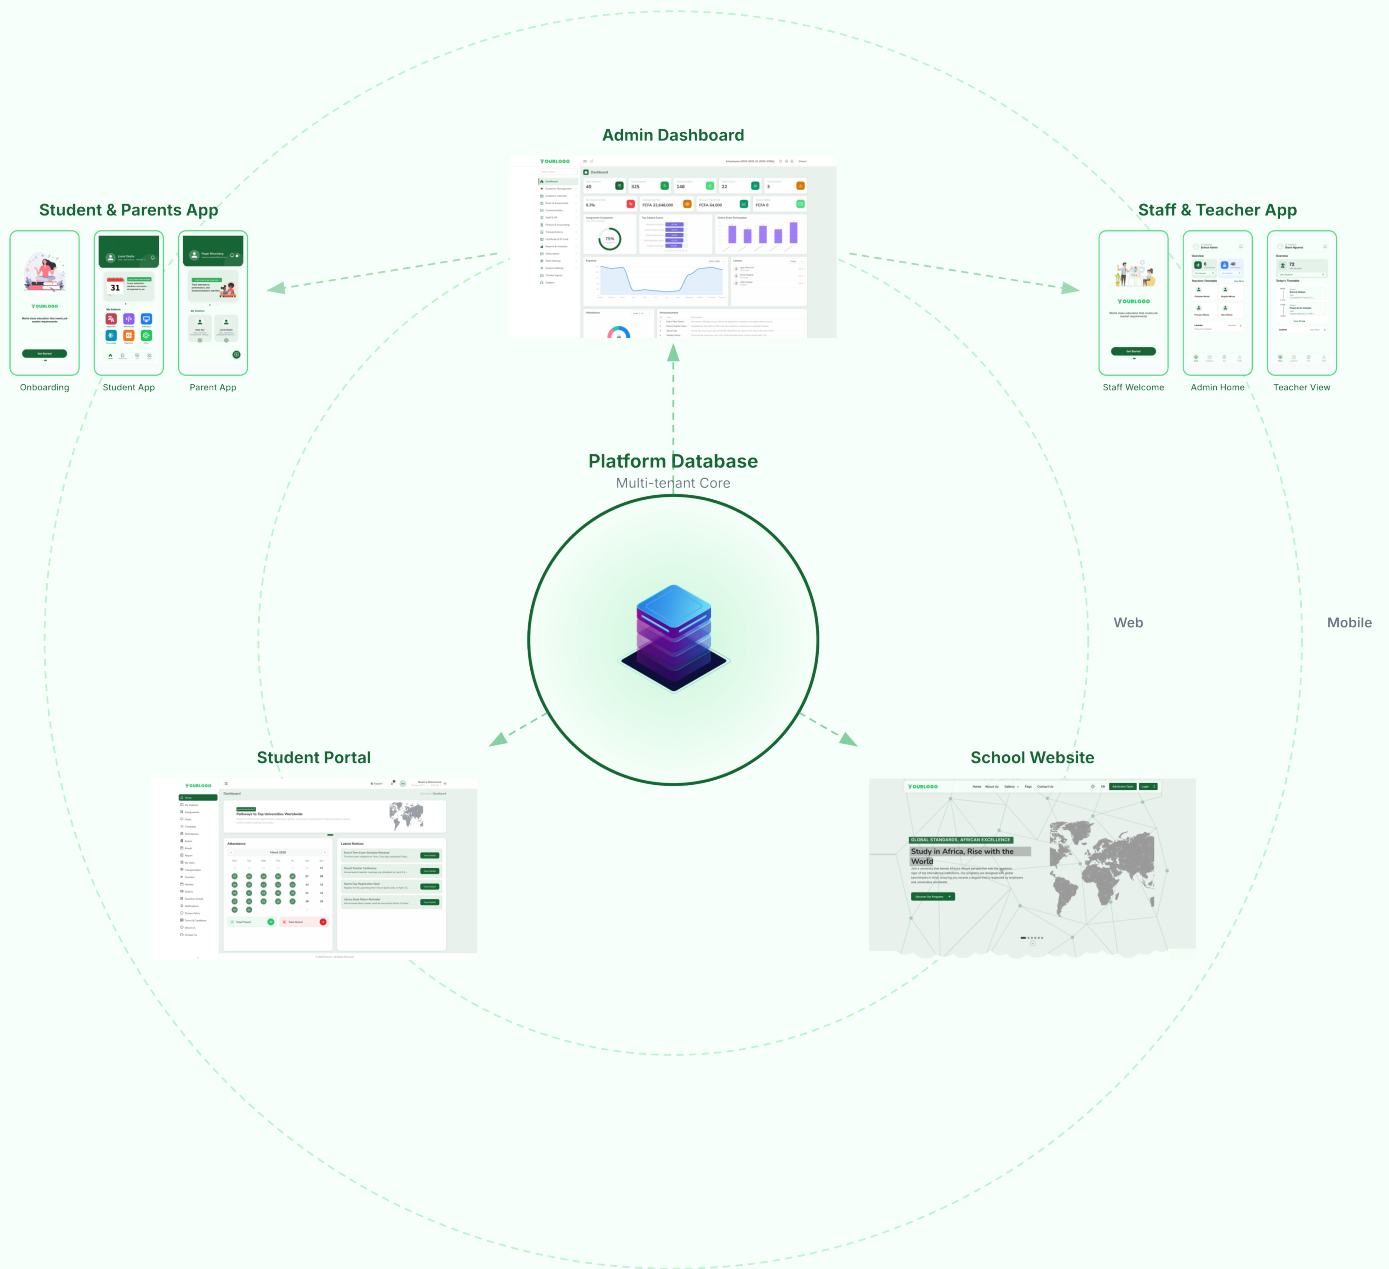

STUNOV STAFF APP

Stunov Staff
For teachers & staff

One subscription. Five connected apps.

One platform. Five connected apps.

Update a mark on the dashboard — it appears on the student's phone. A parent pays in the app — the wallet ticks up on the dashboard. One source of truth, five ways to reach it.

Most schools assemble their tools over years — a website here, a spreadsheet there, a chat group for parents. Stunov brings your admissions, fees, communication, results and online identity into one platform that works together from the first day — live, with no server to buy and no technical team to hire.

Built for

Managers who want to lead with real numbers. Finance teams who need every payment tracked. Teachers who would rather teach than chase paperwork. Parents & students who want the school in their pocket.

Questions every manager should sit with.

Before talking about software, let's talk about reality.

Are Excel, Word and paper registers enough for a school that wants to grow?

Centralisation, version control, fast retrieval and reliable reporting at scale — still possible without a system?

Are WhatsApp and Facebook enough for traceable parent communication?

Can you prove a message reached the right parent, and find that exchange three months later?

Can a modern school ignore online learning and learning continuity?

Catch-up, revision, holiday programmes, remote support — do you have a framework?

How much expense does the school keep absorbing because operations are manual?

Printing, photocopies, calls, travel, cash errors, rework, lost documents — how much every month?

Should a school be built around a few key people or a sustainable system?

When the key people leave, does the operation stay smooth — or would we discover we've been investing in people rather than system?

Can a school claim excellence without a credible digital identity?

Excellence is also measured by online presence, the management reliability.

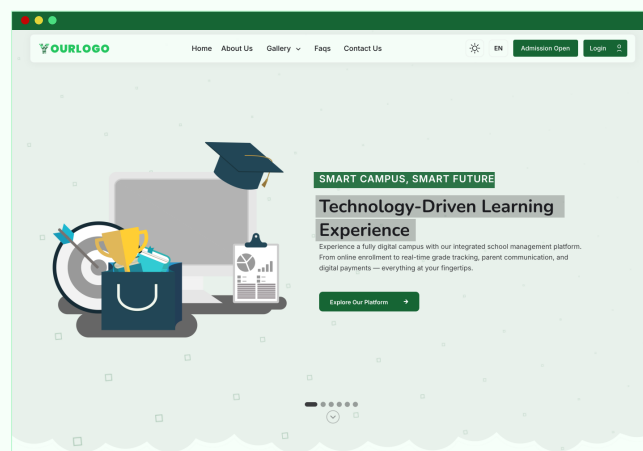

01

Public Website & Site Editor

Your identity, online from day one.

Included, with a permanent address

Sliders, gallery, programmes, announcements and an online admission portal — on a lifetime-free address. Edit colours, content and pages yourself; no designer, no hosting bill.

SCHOOL SITE · A CREDIBLE IDENTITY ONLINE

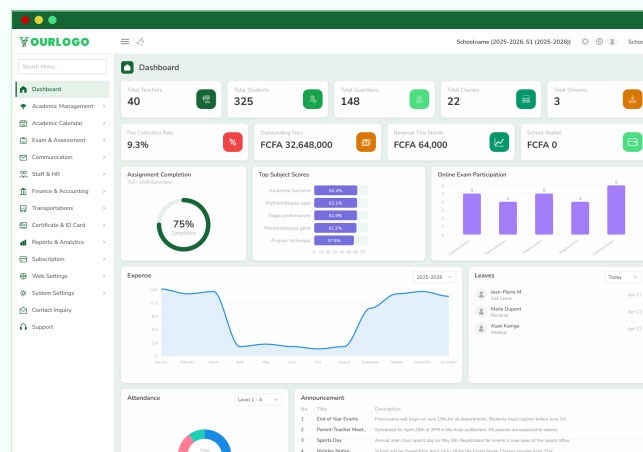

02

Admin Dashboard

Your whole school, on one screen.

Every operation, one place

Admissions, academics, fees, staff, payroll and results — with real-time figures for collection, attendance and enrolment, and role-based access for every team.

DASHBOARD · THE SCHOOL AT A GLANCE

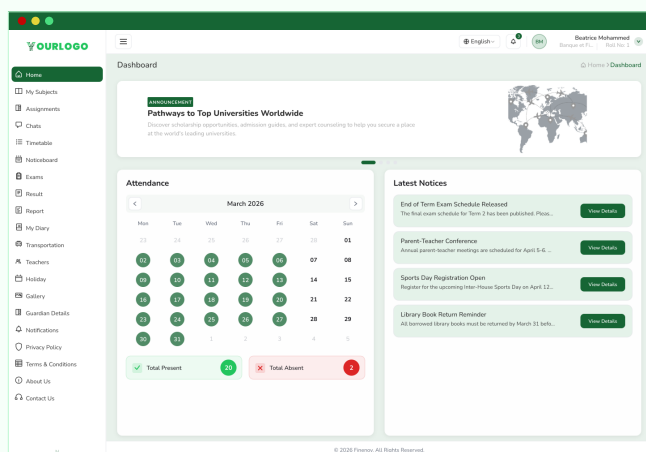

03

Student Web Portal

Results, lessons and exams — in any browser.

No download required

A web portal for students without a smartphone — results, timetables, lessons, assignments and online MCQ exams. Essential for shared devices, labs and cyber-café.

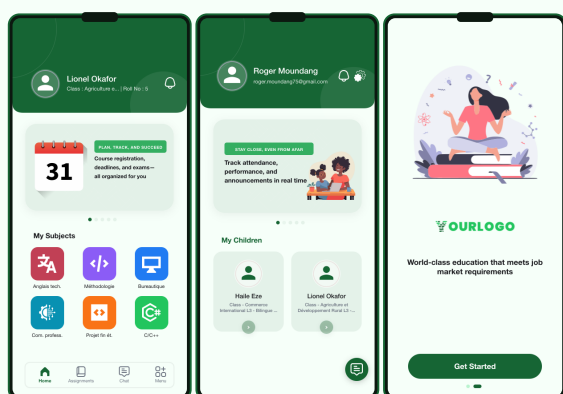

STUDENT PORTAL · OPEN IN ANY BROWSER

04 Stunov — Student & Parent

The school in every family's pocket.

Free on iOS & Android

Real-time attendance, grades, fees, the daily diary and chat — with several children on one account. Offline-first: it keeps working on weak connections and syncs when the network returns.

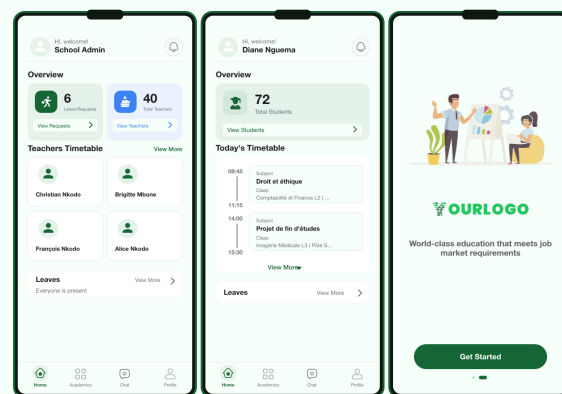

STUDENT HOME · PARENT HOME · ONBOARDING

05 Stunov Staff — Teachers & Staff

Run the day from a phone.

Built for teachers and administrators

Attendance, grading, lesson materials, staff chat and approvals — on iOS and Android. The same offline-first reliability, wherever the work happens.

SCHOOL ADMIN · TEACHER HOME · STAFF ONBOARDING

Strategic advantages, not just features.

Every line here is an outcome Stunov already delivers.

Enrolment without borders. Families apply, enrol, study and graduate from any city or country.

An identity that earns respect. A branded site, apps and certificates at world-class standard — permanent from day one.

Complete infrastructure, nothing to build. One subscription replaces hosting, a dev team and IT.

Parent trust, in real time. Every parent sees attendance, grades, fees and announcements — and stays.

Total financial visibility. Every transaction tracked, timestamped and auditable; zero leakage.

Lower running costs. Replaces paper, printing, ID and certificate vendors, and payroll software.

Scale without strain. From 100 students to well over a thousand — same speed, same reliability.

Leadership driven by data. Collection, attendance, enrolment, payroll — live, on one screen.

Can handle low connectivity. Offline-first apps and a lightweight web portal work where others quietly fail.

Security & backups by default. Each school isolated, continuously backed up, restorable to any point in time.

One place for every family. Announcements, chat and the daily diary replace the school WhatsApp group.

A brand that outlasts any manager. The identity stays consistent, professional and permanent.

Common problems — and Stunov's answer.

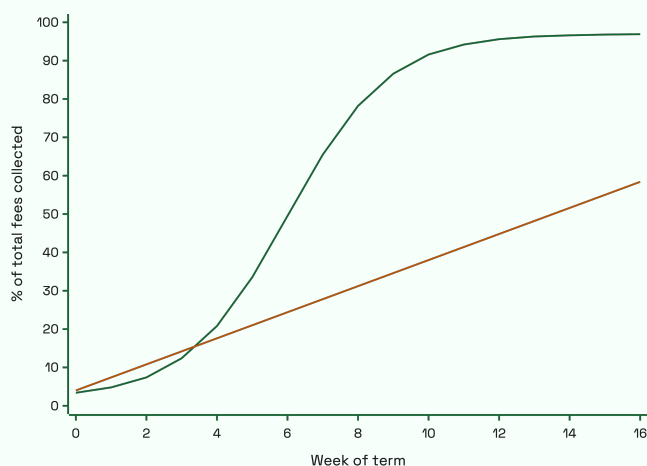

No online presence at all.

A professional, fully functional website is included — permanent address, no designer, no setup fees, no maintenance.

Manual fee collection and missing records.

Every payment tracked from structure to receipt —

timestamped, attributed, instantly receipted. The overdue list builds itself.

FEE COLLECTION CLIMBS ONCE PAYMENT MOVES IN-APP

Parents have no visibility into their child's school life.

A free parent app on iOS and Android with real-time attendance, grades, fees and chat — several children on one account.

Exam results take weeks to communicate.

Enter marks once; the system grades, ranks and generates a PDF for every student in one batch. Three weeks of work becomes three hours.

Payroll is a manual ordeal, month after month.

Define salary structures once; run payroll in one action; payslips and direct disbursement included.

One crash and the records are gone.

Enterprise cloud with continuous backups and an isolated database per school — restorable to any previous state.

Leadership by intuition, not data.

A real-time dashboard — collection vs outstanding, attendance, enrolment, payroll. Facts over impressions.

No online or hybrid learning option.

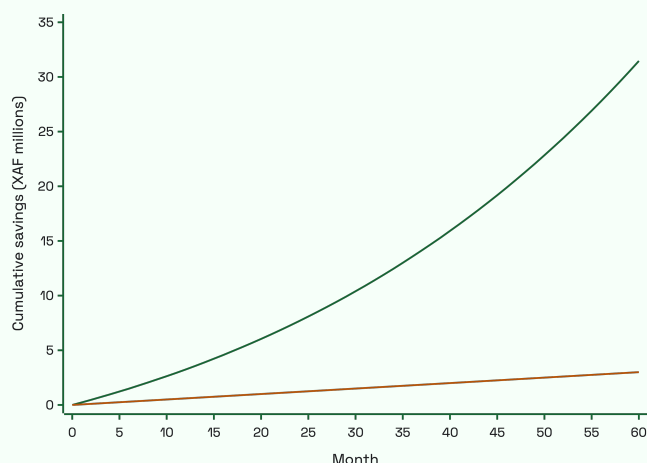

A digital learning layer — lesson library, online MCQ exams and assignment submission — so the programme continues in person, hybrid or fully online.

What changes when you switch.

Schools that move onto Stunov replace paper registers, spreadsheets and scattered chat groups with one reliable system — and the hours saved on paperwork go straight back into teaching.

The shift

From paper, spreadsheets and WhatsApp groups to one hosted system — a professional website, secure fee collection and a real-time window for every parent. No server, no IT team, no setup.

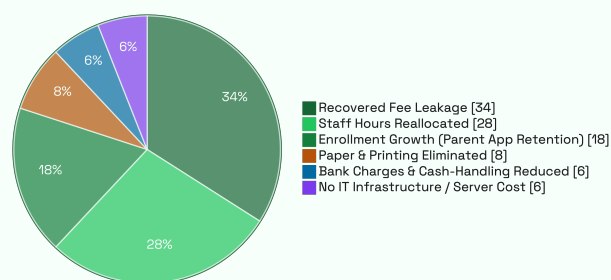

COMPOUND SAVINGS — STUNOV VS THE OLD WAY

Build it yourself vs Stunov

Building it separately: 49–186 M XAF up front, then 15–60 M XAF every year to run it. Stunov Pro: 95 000 XAF / month — everything included, and live from day one.

Feature	Basic	Standard	Pro
Headline price (XAF / month)	45 000	65 000	95 000
Students	450	800	1 300
Staff	55	200	450
Modules	13	21	23
Yearly discount	5%	10%	15%

YEAR-ONE SAVINGS COMPOSITION (XAF)

Get Started

Your whole school. One platform.

A full term of admin — done in minutes.

Book a free 30-minute demo — on site or online.

No server. No IT team. Live from day one.
